EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Marshall Curtis on 2/1/07.

The application has been amended as follows:

Claim 21: In line 7 of the claim, "velocity" has been changed to --speed--.

2. The following is an examiner's statement of reasons for allowance: The prior art does not disclose or suggest ejecting "a recording ink droplet or a refresh ink droplet" with "the refresh ink droplet being deflected by a greater amount than the recording ink droplet when a deflection power is applied to each of the refresh ink droplet and the recording ink droplet; and a detecting means that detects an ejection condition of the ejection member based on a condition of the refresh ink droplet as the refresh ink droplet is collected by the collector" in combination with the remaining claim elements set forth in independent claims 1 and 11 and their dependent claims. Furthermore, the prior art does not disclose or suggest ejecting a refresh ink droplet with the refresh ink droplet differing in weight, mass or speed from a recording ink droplet with a detecting member/means that detects a condition of the ejection member based on the refresh ink droplet in combination with the remaining claim elements set forth in claims 21-26.
